1 Reference Design

1.1. Introduction

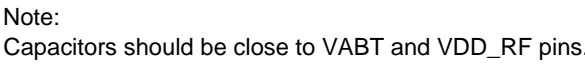

This document provides a reference design for Quectel SC60 module of R1.0 and R2.0 versions.

SC60 R1.0 and R2.0 versions are embedded with a power management IC (PMI8952) to support charger, fuel gauge, WLED driver, flash LED driver and more functions. For more information, please refer to *Quectel_SC60_R1.0&R2.0_Hardware_Design*.

1.2. Schematics

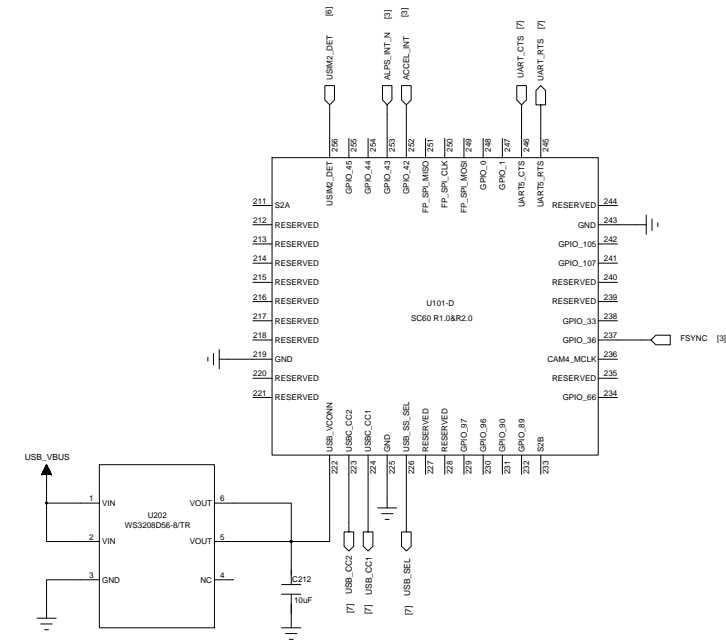

The schematics illustrated in the following pages are provided for your reference only.

1

Quectel Wireless Solutions

	SHEET 1 OF 9	DATE	2018/2/13

Module Interface 2 and Antenna Interfaces

Note:

If active cables are not supported, U202 and capacitor C212 are not recommended to be mounted.

Notes:

1. Keep all RESERVED and unused pins unconnected.
2. All GND pins should be connected to ground.

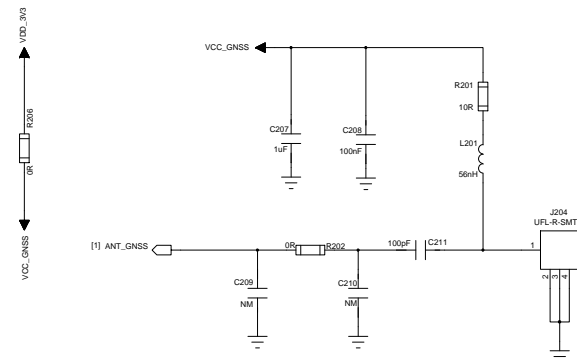

UMTS/LTE Antennas

Wi-Fi/BT Antenna

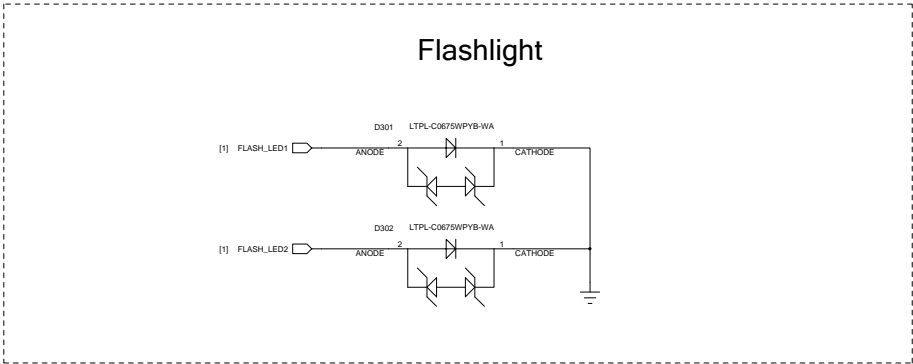

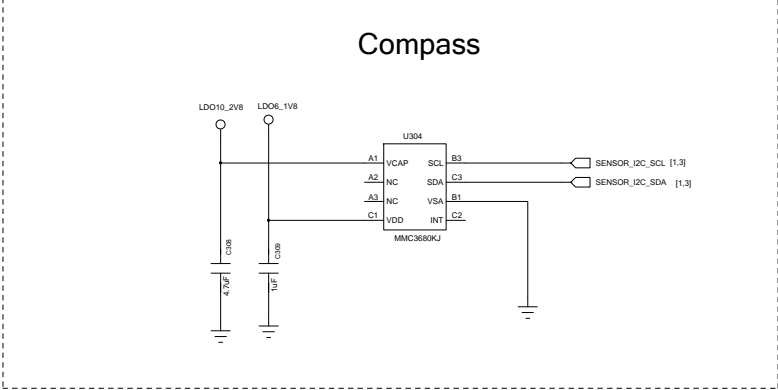

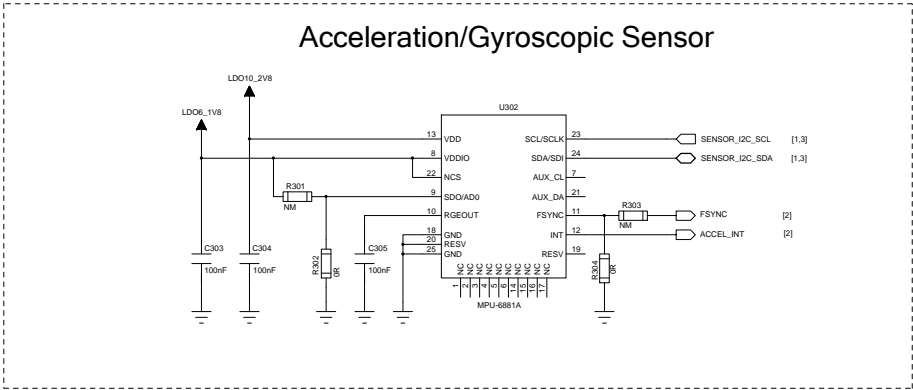

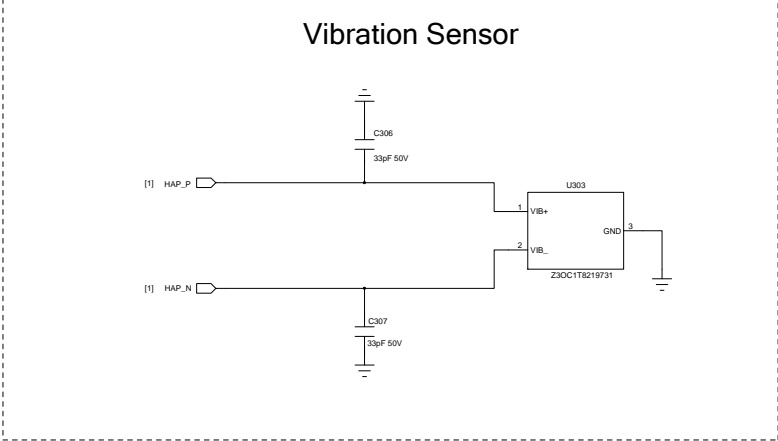

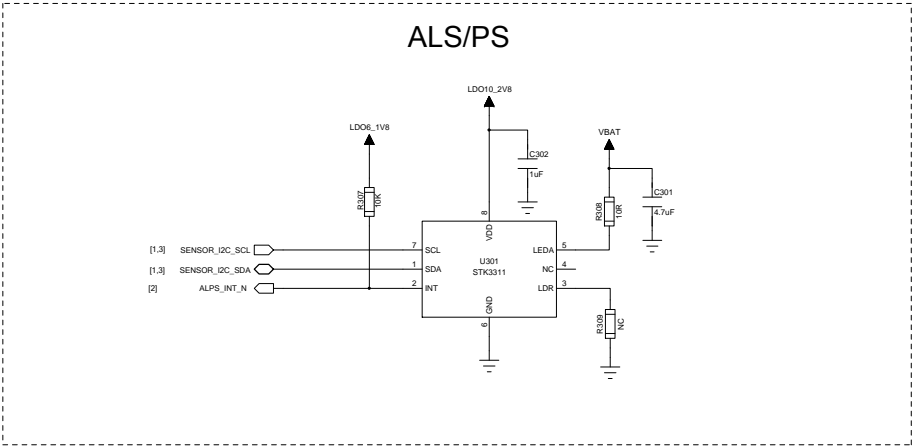

GNSS Antenna

SHEET	4 OF 9	DATE 2018/2/13

D

A

(U)SIM and SD Card Interfaces

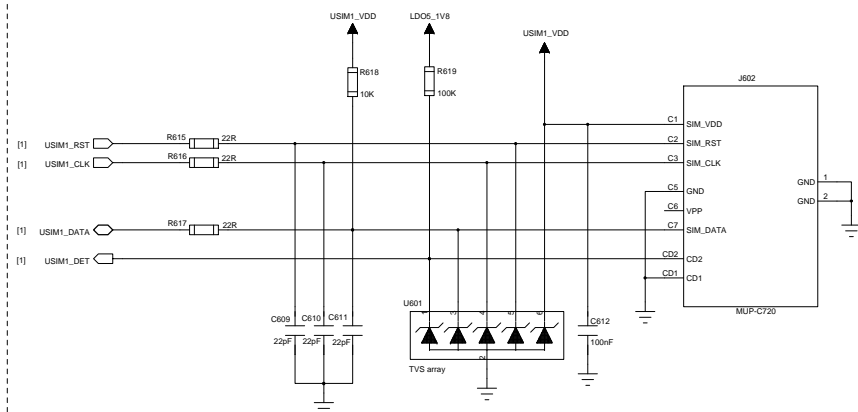

SD Card

Note:

R608~R613 are applied to suppress the EMI spurious transmission and enhance the ESD protection.

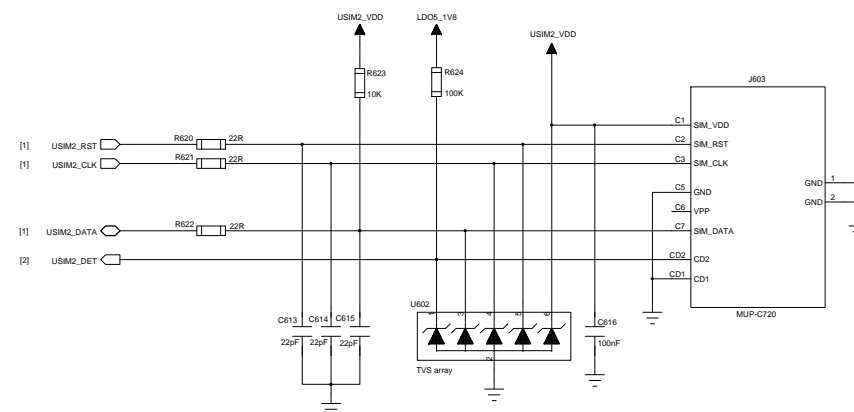

Main (U)SIM

Note:

R615~R617 are applied to suppress the EMI spurious transmission and enhance the ESD protection.

Sub (U)SIM

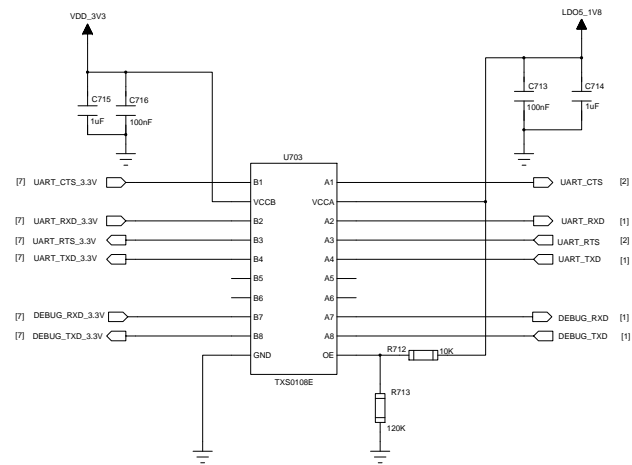

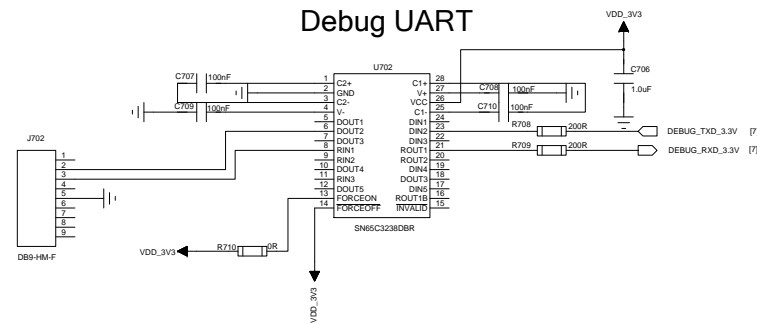

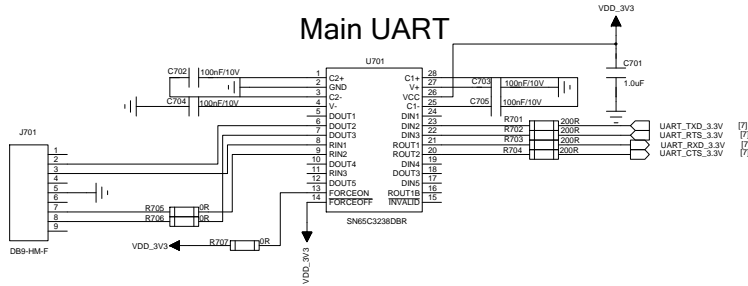

Note:

R620~R622 are applied to suppress the EMI spurious transmission and enhance the ESD protection.

Quectel Wireless Solutions

SHEET 6 OF 9	DATE 2018/2/13	

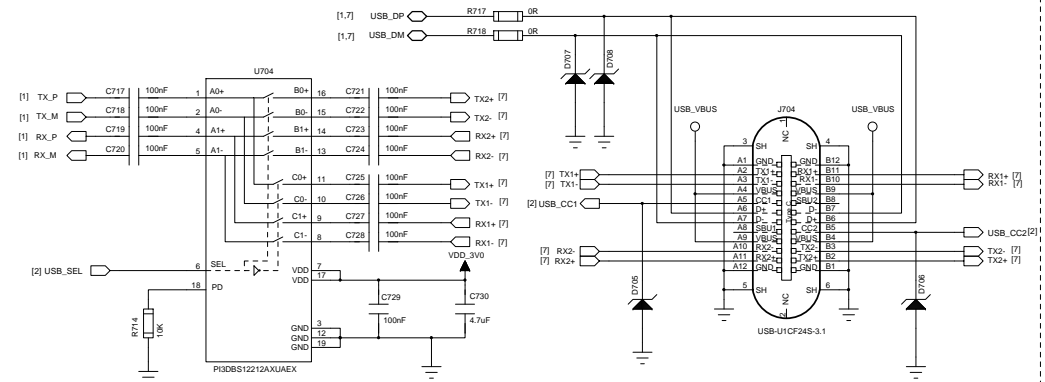

USB and UART Interfaces

USB 2.0

USB 3.0

Notes:

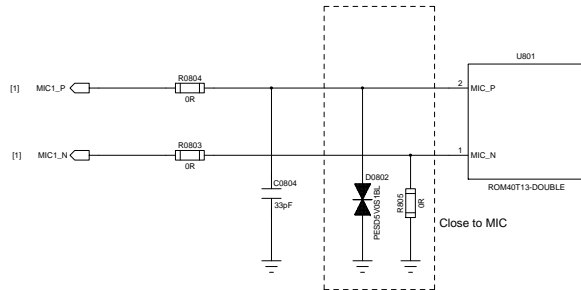

1. If USB 2.0 is supported, R715/R716=0R, R717/R718=NM.
2. If USB 3.0 is supported, R715/R716=NM, R717/R718=0R.
3. It is recommended to add TVS to USB interface.
4. The junction capacitance value of TVS on USB_DP/DM lines should be less than 2pF.
5. The junction capacitance value of TVS on USB_TX/RX lines should be less than 0.5pF.

Quectel Wireless Solutions

Audio Interfaces

ECM-type Microphone

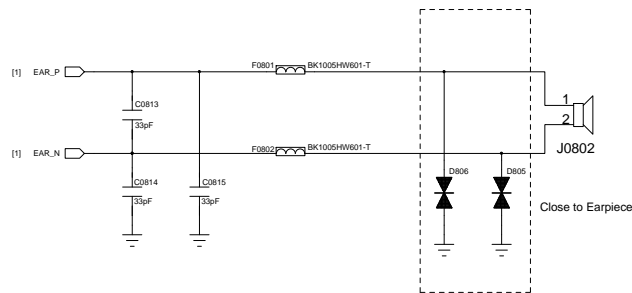

MEMS-type Microphone

Notes:

1. The microphone reference design is just for verify that both types of microphones are available.
2. For customer's design, MEMS-type Microphone is recommended.
3. For more details, please refer to *Quectel_SC60_R1.0&R2.0_Hardware_Design*.

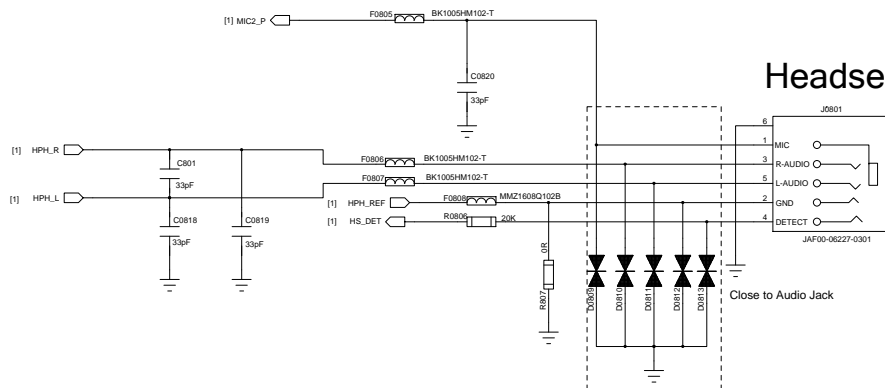

Earpiece

Loudspeaker

Headset

Notes:

TVS diodes for speaker and earpiece interface pins:

1. The maximum breakdown voltage should be less than 6V.
2. The maximum clamping voltage should be less than 12.5V.

TVS diodes for microphones and Headset interface pins:

1. The maximum breakdown voltage should be less than 3.6V.
2. The maximum clamping voltage should be less than 6V.
3. Headset interface has a negative swing and requires a bidirectional TVS.

SHEET	8 OF 9	DATE 2018/2/13

Power Supply

Battery Application

Notes:

1. If battery NTC=47K, R921=NM.
2. If battery NTC=10K, R921=12K.

Power for 3V3

$$V_{out} = [(R911 + R912) / R912] * 1.207 = 3.3V$$

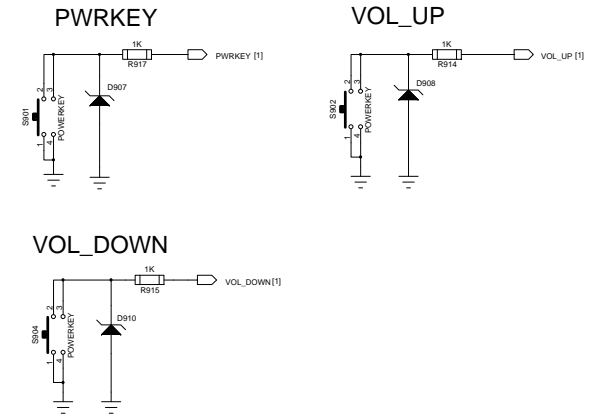

Backup Battery

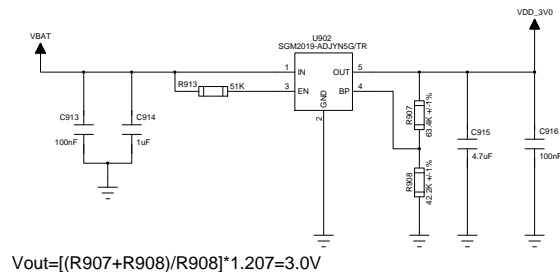

Indicator Lights

Keypad

Power Supply for USB Switch

$$V_{out} = [(R907 + R908) / R908] * 1.207 = 3.0V$$

FORCE_USB_BOOT
